normfinish® Junior

The Normfinish® Junior is a leading blast cabinet with all features to achieve a perfect result. Optimum operation and performance through modern blast technology. For an economical use of fine graded abrasives, Normfinish® sets the standard.

The ergonomic design and application of advanced components in a compact construction guarantees a perfect system.

Good accessibility, easy to operate, excellent visibility in the blast chamber, progressive safety and a low noise level are the main characteristics of this blast cabinet.

Three components integrated in one concept:

- pneumatic blast system
- dust free blast chamber
- dust collector with cartridge element

Technical specifications:
